made a comfortable and super clean bed in each room so that you wake up fresh and recharged with energy to conquer the day. If you are unhappy we will refund the whole money if you let us know within one day that you are not happy with something. This will help us improve.

Why should you stay with us rather than a hotel?

My number one answer is that for a much lesser price of a hotel, with us you actually got much more space than just a standard room and bathroom. When you stay with us you magically you become a local. Try out our town like a native. Most days, you can eat 1–2 meals at a restaurant or café within walking distance, and some days you can buy groceries from the local supermarket and cook at home. You will be amazed how this simple touch gives you a feeling of living like a local, and trust me you will really enjoy it! To get you started our kitchens had some basic food items like tea, coffee, tinned soup, pasta, and the likes. Another important reason is that most hotel rooms look and feel very similar unless you opt for very expensive boutique hotels. With us, you will love the variety our houses give you. We come and meet you, share with you things about best restaurants in the neighborhood, and give you other useful tips. Honestly, if you stay with us once you will have a hard time staying in hotels in the future. With us, you will have a lot of freedom which I think hotels lack and make all the difference. You have access to the whole apartment. We do not lock you out from any room or a closet or a drawer. No one but you can come in without asking you when you live here. I live locally and we are around most of the time.
